

Monitoring Matrix

Name: GIAMMARIA TRIMARCO

Project/intervention title: WORKING FOR YOUTH IN GENOBIA

Indicators	Indicator definition (and unit of measurement)	Data collection method	Period and frequency	Baseline	Target 1	Target 1+n	Person(s) responsible and material support for data collection, management	Users (audience) and use of the information generated
Performance indicators (Outputs/Outcomes from the logical framework)								
Perceived effectiveness from both teachers and students.	Definition: Teachers perceive that the curriculum and the methods are effective in providing skills, sustain engagement, and increasing knowledge and self-efficacy. Students learn new knowledge and skills. Unit of Observation: Teachers and students	Method: Teacher questionnaire; Semester activity records; Open-ended questions to collect feedback Student achievement test results Respondents: Teachers	From the end of the first semester, every six months, for the entire duration of the course (2 years).	At the end of the first semester	After one year, stable and ≥95% of students progress to the next year	At the end of the second year, effectiveness remains stable, and ≥95% of students graduate.	The questionnaire is completed by the teacher but returned to the surveyor. The questionnaire is in paper format; hard copies are stored by the Project Manager (PM), then digitized and entered into an Excel database within a dedicated project database.	Annual results report Dissemination Results are presented to: Vocational training centers Ministry of Education Timing of Presentation: The report is presented at the end of the first and second year, once the results of the assessment tests have been finalized.

Increase in Perceived Employability and Possibility of Starting a Business among Youth in the Bissau Area	Definition Employability: subjective perception of possessing the skills required by the labor market Entrepreneurship: perception of being able to start, manage, and develop a business Unit of Observation Students enrolled in the vocational school	Data Collection Tools Student questionnaire Perception of subjective career success (prospective) Perception of entrepreneurship Perception of skill gaps The questionnaire is administered to each student in paper format at the beginning of the program. Endline Data Collection A short semi-structured interview is conducted at the end of the program, focusing on: Entrepreneurship scale	Beginning, end of the first year, and end of the second year of the course	On the first day of the course. Results are established through data analysis.	End of the first year (results established through data analysis)	End of the second year (results established through data analysis)	Questionnaires are administered by teachers in paper format. Paper copies are processed by an enumerator in each school and entered into a database. Paper copies are stored by the Project Manager (PM). Results are analyzed by the enumerator. Digital copies are stored in Excel files within a dedicated project database. Hard copies are securely kept by the Project Manager.	Reporting Format Results are included in: Annual project reports Outcome reports Dissemination Results are presented to: Project team Vocational training centers Ministry of Education Timing of Presentation: Baseline (beginning of the program) End of first year End of second year

		Self-efficacy scale Method of Administration Paper-based questionnaire, administered at the beginning of the year Target Group Enrolled students						
Increase in effective Employability and Entrepreneurship for Youth in Bissau Area	Definition Employability: presence or absence of formal employment or a traineeship in the past twelve months Entrepreneurship: starting a personal business or a business with someone else in the past twelve months Unit of observation Students enrolled in the course	Method: Questionnaire administered to students in class or by phone Respondents: Students	Baseline is measured at the start of the course, then the questionnaire will be administered by contacting students 6 months and 1 year after the end of the course via telephone by surveyors.	It is expected that less than 10% have started a business or have had, or currently have, formal employment.	Six months after the end of the project cycle (two years), at least 30% of enrolled students have ave formal employment or started a business	One year after the end of the project cycle (two years), at least 70% of students have formal employment or have started a business.	At baseline, the questionnaire is administered by teachers. At T1 and T2, telephone interviews will be conducted by hired enumerators. Hard copies at T1 will be kept by the PM and digitized for entry into an Excel database within the dedicated project database. Results from the telephone interviews at T1 and T2 will be collected online and stored in an Excel file	Reporting format: Results will be delivered as part of annual reports and included also in the final evaluation report Dissemination: Follow-up student outcome tracking reports are sent to the vocational center, Ministry of Labor, vocational studies departments, donors, and Ministry of Education. Timing of presentation Baseline: after the first year

							into the same database as the updated hard copy sheets.	T1: one year after the end of the course T2: one and a half years after the end of the course
Assumptions								
Transportation routes are active, in place, and sufficient for all participating students.	Teachers apply the methods and techniques acquired during the training and follow the established program without deviation.	Beneficiaries attend classes and actively search for formal employment and/or develop their own entrepreneurial projects.	Scholarship funding remains in place for students who need to attend the training.	<i>Not applicable</i>			Surveyors on field and respondents provide answers to the questionnaires.	The intervention remains in place, and the government and the Ministry of Labour do not withdraw support due to political or social unrest.
